Clemente's Anatomy Dissector, Third Edition, is a comprehensive manual of anatomical dissection, organized into 38 chapters covering small, discrete areas of the human body. Each chapter is designed to stand alone, so that instructors can easily adapt the material to their preferred dissection sequence.

The book provides more in-depth and detailed explanations for each dissection than any other lab manual, enabling students to self-teach. It correlates surface anatomy to anatomical structures revealed in the dissections, which is important for clinical correlation. Every page is cross-referenced to the newest editions of Clemente's, Grant's, Netter's and Rohen's anatomy atlases.

A companion website offers full text online.
