A Psychological Analysis of Adolf Hitler

Walter Langer
Hitler's Sexual development.
A Classic in The History of Psychology

Langer's report on Adolf Hitler not only showcased the dominant discourse of psychological analysis at the time, but it also served as the catalyst for the development of political profiling as a discipline.

Psychology Gets Political

Without doubt the greatest legacy of Langer's report was the influence it had on the field of political profiling. Dr Jerrold Post cites Langer's analysis of Hitler as the inspiration for the profiling unit he established at the CIA in the 1970s; which would subsequently go on to profile every important world leader up to and including Saddam Hussein.

In discussing Langer's psychological profile of Hitler during an interview with the BBC, Post stated:

"*We must understand the leaders we are contending with - you can't deter optimally a leader you don't understand - and to relegate be it a Hitler or a Joseph Stalin or a Saddam Hussein to a crazy evil madman really degrades our capacity to deal with them optimally because we're not thinking about what pushes them, what makes them tick.*"

While the value of political profiling remains open to question, the seminal importance of Langer's psychological study of Hitler in influencing the discipline is not.

A Psychological Analysis of Adolf Hitler has been produced as part of an initiative by the website All About Psychology to make important psychology publications widely available.
