Jonathan Owens

Early Arabic Grammatical Theory: Heterogeneity and standardization (Studies in the History of the Language Sciences) Jonathan Owens
The Arabic grammatical tradition is remarkable for having organized a large amount of descriptive material within a sophisticated formal framework. The present study seeks to elucidate the early development of this system from a theory-internal perspective; it is mainly concerned with the development of the syntactic theory as a formal object, as system of rules. This endeavor is constituted of four sub-goals: a description of early developments, their periodization, their relation to the traditional account in terms of the Basran and Kufan schools, and their relation to modern linguistic theory.
