GPS: Software Library Guochang Xu

This reference and handbook describes the functional software library of the Global Positioning System (GPS/Galileo). It is the original software source-code of many functions, models, algorithms and tools described in the textbook "GPS – Theory, Algorithms and Applications" written by the same author published by Springer. The software functions are parts of the KSGsoft and MFGsoft programs developed by the author at the GFZ in Potsdam. All the source-code are verified by real GPS data processing applications. The software uses the books "GPS – Theory, Algorithms and Applications" as its theoretical description. The functional library covers physical models, disturbance models, mathematical methods, adjustment and filtering algorithms, the transformation, interpolation, integration methods, and numerous tools.

From reader reviews:

Marie Walsh:

Playing with family within a park, coming to see the sea world or hanging out with pals is thing that usually you have done when you have spare time, and then why you don't try matter that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love GPS: Software Library, you may enjoy both. It is fine combination right, you still want to miss it? What kind of hang type is it? Oh come on its mind hangout people. What? Still don't have it, oh come on its identified as reading friends.

Chris Boos:

Many of us recommend that straight away because this reserve has good vocabulary that will increase your knowledge in terminology, easy to understand, bit entertaining but still delivering the information. The writer giving his/her effort to set every word into joy arrangement in writing GPS: Software Library although doesn't forget the main stage, giving the reader the hottest along with based confirm resource information that maybe you can be certainly one of it. This great information can certainly drawn you into fresh stage of crucial imagining.

Violet Jarrell:

The book untitled GPS: Software Library contain a lot of information on the idea. The writer explains your ex idea with easy method. The language is very clear to see all the people, so do not worry, you can easy to read the idea. The book was authored by famous author. The author provides you in the new period of literary works. You can actually read this book because you can please read on your smart phone, or device, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site and also order it. Have a nice go through.

Lynn Bailey:

As a student exactly feel bored to be able to reading. If their teacher requested them to go to the library or to make summary for some reserve, they are complained. Just little students that has reading's heart and soul or real their interest. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading seriously. Any students feel that studying is not important, boring and can't see colorful images on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this GPS: Software Library can make you feel more interested to read.
