Man-Made Global Warming?: It's Foolishness in Words That All Can Understand Tom Shipley
I am not a climatic scientist; I am an experienced electrical engineer, drawn to study this subject by the peculiarity of the news I was observing. And it became obvious, very quickly, that something weird was going on. So I began to collect data, news, and other factual information that gradually became available. I have now assembled a wide range of proven, factual details on global warming (which became climate change when warming stopped in 1998 and temperatures began to drop), the claims and counter claims that have been published over the years, and some of my own observations arising from an engineering point of view. My purpose is to put all of the facts I have assembled in one location, for ease of observation and analysis, and to show the absolute foolishness involved. Others who also became interested have seen much of this information before, reported as individual elements or events, and responded to one at a time. In each case, global warming enthusiasts have responded to each individual weakness reported with the comment that, yes, that was one little problem . . . but with all things considered, man-made global warming is `settled science'. " It will be interesting to see their responses to the entire range of factual information as developed by reputable scientists and engineers, some of which are listed below, when all are presented in detail and absolutely refute the idea that, "man-made global warming is `settled science.'" · Surface and marine temperature measurements - - totally lacking in the accuracy necessary to detect the small variations involved. We show that, absolutely. Global temperatures have not affected the amount of carbon dioxide in the atmosphere - they have no relationship to each other. We present data to show that absolutely. Global warming cannot possibly be causing an increase in CO2. Human's activities are exonerated, absolutely. Satellite measurements have been shown to
