**Image Mosaicing and Super-resolution (Distinguished Dissertations)** David Capel
This book investigates sets of images consisting of many overlapping viewsofa scene, and how the information contained within them may be combined to produce single images of superior quality. The generic name for such techniques is frame fusion. Using frame fusion, it is possible to extend the fieldof view beyond that ofany single image, to reduce noise, to restore high-frequency content, and even to increase spatial resolution and dynamic range. The aim in this book is to develop efficient, robust and automated frame fusion algorithms which may be applied to real image sequences. An essential step required to enable frame fusion is image registration: computing the point-to-point mapping between images in their overlapping region. This sub problem is considered in detail, and a robust and efficient solution is proposed and its accuracy evaluated. Two forms of frame fusion are then considered: image mosaic ing and super-resolution. Image mosaicing is the alignment of multiple images into a large composition which represents part of a 3D scene. Super-resolution is a more sophisticated technique which aims to restore poor-quality video sequences by mod elling and removing the degradations inherent in the imaging process, such as noise, blur and spatial-sampling. A key element in this book is the assumption of a completely uncalibrated cam era. No prior knowledge of the camera parameters, its motion, optics or photometric characteristics is assumed. The power of the methods is illustrated with many real image sequence examples.

**From reader reviews:**

**Carlos Terrill:**

As people who live in often the modest era should be change about what going on or information even knowledge to make all of them keep up with the era that is always change and make progress. Some of you maybe will probably update themselves by looking at books. It is a good choice for you but the problems coming to a person is you don't know what one you should start with. This Image Mosaicing and Super-resolution (Distinguished Dissertations) is our recommendation to make you keep up with the world. Why, because this book serves what you want and want in this era.

**Elizabeth Nicholson:**

The book untitled Image Mosaicing and Super-resolution (Distinguished Dissertations) contain a lot of information on that. The writer explains the girl idea with easy technique. The language is very clear and understandable all the people, so do definitely not worry, you can easy to read that. The book was compiled by famous author. The author will bring you in the new era of literary works. If you want to buy the e-book, you can open up their official web-site in addition to order it. Have a nice go through.

**Michael Slay:**

You can obtain this Image Mosaicing and Super-resolution (Distinguished Dissertations) by visit the bookstore or Mall. Just viewing or reviewing it might to be your solve problem if you get difficulties for your knowledge. Kinds of this reserve are various. Not only by simply written or printed and also can you enjoy this book by e-book. In the modern era such as now, you just looking of your mobile phone and searching what your problem.
