**Modern Mathematical Methods for Physicists and Engineers** C. D. Cantrell
The advent of powerful desktop computers has revolutionized scientific analysis and engineering design in fields as disparate as particle physics and telecommunications. This up-to-date volume provides the essential mathematical and computational education for students, researchers, and practicing engineers. The author begins with a review of computation, and then deals with a range of key concepts including sets, fields, matrix theory, and vector spaces. He then goes on to cover more advanced subjects such as linear mappings, group theory, and special functions. He concentrates exclusively on the most important topics for the working physical scientist or engineer with the aim of helping them to make intelligent use of the latest computational and analytical methods. The book contains well over 400 homework problems and covers many topics not dealt with in other textbooks. It will be ideal for senior undergraduate and graduate students in the physical sciences and engineering, as well as a valuable reference for working engineers.

**From reader reviews:**

**Jesse Valles:**

This Modern Mathematical Methods for Physicists and Engineers is great reserve for you because the content which is full of information for you who have always deal with world and still have to make decision every minute. That book reveal it facts accurately using great organize word or we can declare no rambling sentences inside. So if you are read that hurriedly you can have whole information in it. Doesn't mean it only offers you straight forward sentences but tough core information with beautiful delivering sentences. Having Modern Mathematical Methods for Physicists and Engineers in your hand like keeping the world in your arm, info in it is not ridiculous one. We can say that no guide that offer you world throughout ten or fifteen small right but this book already do that. So , this is certainly good reading book. Hello Mr. and Mrs. stressful do you still doubt which?

**Richard Segers:**

In this period of time globalization it is important to someone to acquire information. The information will make anyone to understand the condition of the world. The condition of the world makes the information simpler to share. You can find a lot of references to get information example: internet, magazine, book, and soon. You can observe that now, a lot of publisher that print many kinds of book. Typically the book that recommended to you is Modern Mathematical Methods for Physicists and Engineers this guide consist a lot of the information of the condition of this world now. This kind of book was represented so why is the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. Typically the writer made some study when he makes this book. That is why this book suitable all of you.

**Marcela Beach:**

In this era which is the greater man or who has ability to do something more are more important than other. Do you want to become considered one of it? It is just simple strategy to have that. What you have to do is just spending your time almost no but quite enough to enjoy a look at some books. One of several books in the top record in your reading list is Modern Mathematical Methods for Physicists and Engineers. This book which is qualified as The Hungry Inclines can get you closer in turning into precious person. By looking upwards and review this publication you can get many advantages.

**Abigail Shelton:**

Reading a book make you to get more knowledge from it. You can take knowledge and information originating from a book. Book is published or printed or highlighted from each source in which filled update of news. With this modern era like today, many ways to get information are available for you actually. From media social including newspaper, magazines, science publication, encyclopedia, reference book, story and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just searching for the Modern Mathematical Methods for Physicists and Engineers when you

required it?
