Applied Survival Analysis Using R (Use R!)

Dirk F. Moore

Applied Survival Analysis Using R (Use R!) Dirk F. Moore
Applied Survival Analysis Using R covers the main principles of survival analysis, gives examples of how it is applied, and teaches how to put those principles to use to analyze data using R as a vehicle. Survival data, where the primary outcome is time to a specific event, arise in many areas of biomedical research, including clinical trials, epidemiological studies, and studies of animals. Many survival methods are extensions of techniques used in linear regression and categorical data, while other aspects of this field are unique to survival data. This text employs numerous actual examples to illustrate survival curve estimation, comparison of survivals of different groups, proper accounting for censoring and truncation, model variable selection, and residual analysis.

Because explaining survival analysis requires more advanced mathematics than many other statistical topics, this book is organized with basic concepts and most frequently used procedures covered in earlier chapters, with more advanced topics near the end and in the appendices. A background in basic linear regression and categorical data analysis, as well as a basic knowledge of calculus and the R system, will help the reader to fully appreciate the information presented. Examples are simple and straightforward while still illustrating key points, shedding light on the application of survival analysis in a way that is useful for graduate students, researchers, and practitioners in biostatistics.

From reader reviews:

Numbers Harless:

As people who live in often the modest era should be upgrade about what going on or facts even knowledge to make these keep up with the era and that is always change and advance. Some of you maybe may update themselves by examining books. It is a good choice for yourself but the problems coming to you actually is you don't know what kind you should start with. This Applied Survival Analysis Using R (Use R!) is our recommendation to help you keep up with the world. Why, because this book serves what you want and want in this era.

Matthew Williams:

Do you certainly one of people who can't read gratifying if the sentence chained inside the straightway, hold on guys that aren't like that. This Applied Survival Analysis Using R (Use R!) book is readable through you who hate the perfect word style. You will find the information here are arrange for enjoyable looking at experience without leaving even decrease the knowledge that want to deliver to you. The writer of Applied Survival Analysis Using R (Use R!) content conveys thinking easily to understand by a lot of people. The printed and e-book are not different in the content material but it just different available as it. So , do you still thinking Applied Survival Analysis Using R (Use R!) is not loveable to be your top collection reading book?

Flora Godfrey:

Reading a guide tends to be new life style in this particular era globalization. With looking at you can get a lot of information which will give you benefit in your life. With book everyone in this world may share their idea. Textbooks can also inspire a lot of people. Many author can inspire their reader with their story or perhaps their experience. Not only the storyline that share in the publications. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors on this planet always try to improve their expertise in writing, they also doing some analysis before they write to their book. One of them is this Applied Survival Analysis Using R (Use R!).

Sally McGarvey:

What is your hobby? Have you heard which question when you got learners? We believe that that issue was given by teacher to the students. Many kinds of hobby, Every person has different hobby. Therefore you know that little person such as reading or as looking at become their hobby. You need to know that reading is very important and book as to be the matter. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You discover good news or update concerning something by book. A substantial number of sorts of books that can you go onto be your object. One of them is niagra Applied Survival Analysis Using R (Use R!).
