Computational Models in Political Economy

Computational Models in Political Economy

Researchers are increasingly turning to computational methods to study the dynamic properties of political and economic systems. Politicians, citizens, interest groups, and organizations interact in dynamic, complex environments, and the static models that are predominant in political economy are limited in capturing fundamental features of economic decision making in modern democracies. Computational models--numerical approximations of equilibria and dynamics that cannot be solved analytically--provide useful insight into the behavior of economic agents and the aggregate properties of political systems. They serve as a valuable complement to existing mathematical tools.This book offers some of the latest research on computational political economy. The focus is on theoretical models of traditional problems in the field. Each chapter presents an innovative model of interaction between economic agents. Topics include voting behavior, candidate position taking, special interest group contributions, macroeconomic policy making, and corporate decision making.

From reader reviews:

Eric Beasley:

Nowadays reading books become more than want or need but also turn into a life style. This reading routine give you lot of advantages. The benefits you got of course the knowledge your information inside the book this improve your knowledge and information. The information you get based on what kind of publication you read, if you want have more knowledge just go with knowledge books but if you want truly feel happy read one with theme for entertaining for example comic or novel. The particular Computational Models in Political Economy is kind of book which is giving the reader capricious experience.

David Brouwer:

Information is provisions for anyone to get better life, information presently can get by anyone with everywhere. The information can be a information or any news even restricted. What people must be consider any time those information which is inside former life are challenging to be find than now is taking seriously which one would work to believe or which one often the resource are convinced. If you have the unstable resource then you understand it as your main information you will have huge disadvantage for you. All those possibilities will not happen with you if you take Computational Models in Political Economy as your daily resource information.

Francis Knapp:

Why? Because this Computational Models in Political Economy is an unordinary book that the inside of the reserve waiting for you to snap this but latter it will surprise you with the secret the idea inside. Reading this book adjacent to it was fantastic author who write the book in such amazing way makes the content inside of easier to understand, entertaining technique but still convey the meaning fully. So , it is good for you for not hesitating having this any longer or you going to regret it. This excellent book will give you a lot of gains than the other book possess such as help improving your proficiency and your critical thinking technique. So , still want to delay having that book? If I had been you I will go to the book store hurriedly.

Armando Morris:

This Computational Models in Political Economy is brand-new way for you who has curiosity to look for some information as it relief your hunger info. Getting deeper you upon it getting knowledge more you know or else you who still having bit of digest in reading this Computational Models in Political Economy can be the light food in your case because the information inside this particular book is easy to get simply by anyone. These books acquire itself in the form which is reachable by anyone, sure I mean in the e-book form. People who think that in publication form make them feel sleepy even dizzy this book is the answer. So you cannot find any in reading a publication especially this one. You can find actually looking for. It should be here for anyone. So , don't miss the idea! Just read this e-book variety for your better life and knowledge.
