Patterns and Processes in Forest Landscapes: Multiple Use and Sustainable Management

Patterns and Processes in Forest Landscapes: Multiple Use and Sustainable Management

Increasing evidence suggests that the composition and spatial configuration – the pattern – of forest landscapes affect many ecological processes, including the movement and persistence of particular species, the susceptibility and spread of disturbances such as fires or pest outbreaks, and the redistribution of matter and nutrients. Understanding these issues is key to the successful management of complex, multifunctional forest landscapes, and landscape ecology, based on a foundation of island bio-geography and meta-population dynamic theories, provides the rationale to deal with this pattern-to-process interaction at different spatial and temporal scales.

This carefully edited volume represents a stimulating addition to the international literature on landscape ecology and resource management. It provides key insights into some of the applicable landscape ecological theories that underlie forest management, with a specific focus on how forest management can benefit from landscape ecology, and how landscape ecology can be advanced by tackling challenging problems in forest (landscape) management. It also presents a series of case studies from Europe, Asia, North America, Africa and Australia exploring the issues of disturbance, diversity, management, and scale, and with a specific focus on how human intervention affects forest landscapes and, in turn, how landscapes influence humans and their culture.

An important reference for advanced students and researchers in landscape ecology, conservation biology, forest ecology, natural resource management and ecology across multiple scales, the book will also appeal to researchers and practitioners in reserve design, ecological restoration, forest management, landscape planning and landscape architecture.

From reader reviews:

Susan Metcalf:

Are you kind of hectic person, only have 10 or maybe 15 minute in your moment to upgrading your mind proficiency or thinking skill also analytical thinking? Then you are having problem with the book compared to can satisfy your short period of time to read it because all this time you only find book that need more time to be examine. Patterns and Processes in Forest Landscapes: Multiple Use and Sustainable Management can be your answer because it can be read by you actually who have those short time problems.

Lola Paolucci:

Reading a book for being new life style in this season; every people loves to study a book. When you read a book you can get a lot of benefit. When you read ebooks, you can improve your knowledge, since book has a lot of information onto it. The information that you will get depend on what types of book that you have read. If you would like get information about your analysis, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these us novel, comics, as well as soon. The Patterns and Processes in Forest Landscapes: Multiple Use and Sustainable Management provide you with new experience in reading through a book.

Vincent Baker:

You can obtain this Patterns and Processes in Forest Landscapes: Multiple Use and Sustainable Management by visit the bookstore or Mall. Just simply viewing or reviewing it can to be your solve problem if you get difficulties to your knowledge. Kinds of this guide are various. Not only by written or printed and also can you enjoy this book by means of e-book. In the modern era such as now, you just looking by your mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your reserve. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose appropriate ways for you.

John Lien:

What is your hobby? Have you heard which question when you got pupils? We believe that that issue was given by teacher for their students. Many kinds of hobby, All people has different hobby. So you know that little person such as reading or as studying become their hobby. You must know that reading is very important and book as to be the issue. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You see good news or update about something by book. Numerous books that can you decide to try be your object. One of them is actually Patterns and Processes in Forest Landscapes: Multiple Use and Sustainable Management.
