I will tell you what works and what doesn't work based on my own case studies and hopefully that will save you time and money in taking the wrong path. Let's take a quick look at what you should expect to learn in the coming chapters: • You will discover a website where you can submit the best article you can write. Once your article is "dug" you can expect thousands upon thousands of visitors to flock to your website overnight. And for as long as your article is "dug" by other people, the amount of traffic you will receive will remain at such a competitive and sustainable level. • You will discover a new way of categorising topics. The way it works is much like the algorithms of search engines. The difference? This system employs human intervention instead of purely relying on mindless search engine spiders. • You will discover a new way of promoting your links via a new manner of networking. This kind of networking is user-based, and soon enough, your link will be promoted all over the Internet! • You will discover a website that generates more than twice the amount of visitors who use Google. Google is the number one search engine in the world, making it a very potent marketing tool via search engine optimization (SEO) tactics. Imagine then the possibilities of being able to play with a venue that is even more powerful than Google. • You will discover a website that can redirect thousands of hits per day. This website is just begging for some viral marketing fodder that can fuel your marketing campaign for many, many years to come. • You will discover a lot of tricks you can implement to provide fresh content for your website, each and every day of the week.
